No and that's on me I should have had one created but I had been charging my review to the generic enforcement code. Sorry about that!

I'm wrapping it up. And I put comments in track changes. Will send within the hour. Does this site have a site-specific work code?

Is there some language that we should request them to add to the conclusion so that it is consistent with the text?

I'm in the conclusion, but it seems that some of the discussions in the conclusion do not match the surface water results section. Looking at the tables to see if I'm missing something.

I know smh. I don't know where they could have pulled a clean background from. There is so many industrial outputs on this river.

Don't worry about it! I asked them to give us a few more weeks with the review. Thank you so much!

Hey Sandra,

I know you were working on the G&L Doc record but did you have some time to look at the Lake Conestee SI this week?

Best wishes,

Alayna Famble
